

**The more  
FUCK  
BUDDIES  
you have...**

**the more STI  
tests you need.**

**Having fuck buddies is fun but be aware that while condoms are effective for preventing HIV, they may not be as effective in preventing syphilis, gonorrhoea and Chlamydia.**

**You can have any of these STIs without showing symptoms and pass them on to your fuck buddies.**

**For more info on STIs, testing, treatments or the location of clinics and doctors, check out [www.whytest.org](http://www.whytest.org) or call the Sexual Health Infoline on 1800 451 624.**
