

# Had a painless sore on your COCK or ARSE?

## get an STI test.

You might have syphilis.

Symptoms can include:

- 1 - Painless sores on the cock, balls, arse, or mouth,
- 2 - A rash on the hands, feet or other body parts and
- 3 - Damage to the nerves, brain, spine, eyes and skin.

If you've had any of these symptoms consider others and avoid having sex until you have had a test.

For more info on STIs, testing, treatments or the location of clinics and doctors, check out [www.whytest.org](http://www.whytest.org) or call the Sexual Health Infoline on 1800 451 624.
